No audio?

Try these troubleshooting steps:

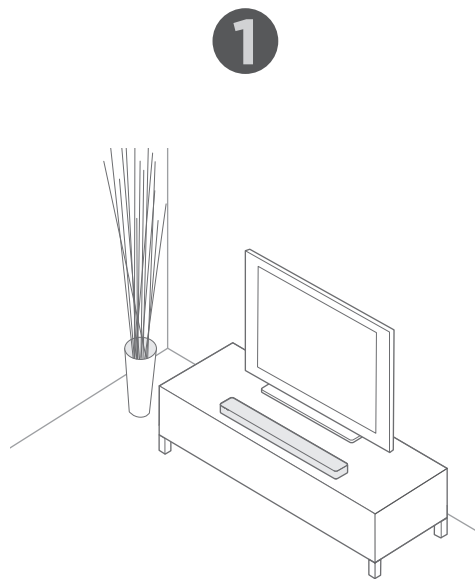

- Make sure the soundbar's HDMI cable is inserted into an **HDMI ARC** or **Audio Return Channel** connector on your TV, not a standard HDMI connector.
- If the soundbar is connected to your TV's HDMI ARC connector, make sure that Consumer Electronics Control (CEC) is enabled in your TV system menu. Your TV may refer to CEC by a different name. Refer to your TV owner's guide.
NOTE: CEC is fully enabled on the soundbar by default.
- Connect to the soundbar using both the HDMI cable (inserted into your TV's HDMI ARC connector) and the optical cable (see step 2, "Choose an audio cable").
